

How can you do your best work, if you aren't using the latest technology?

Improved  
Clinical  
Outcomes

Streamlined  
Workflow

Reduced  
Healthcare  
Costs

## AI FOR RADIOLOGY IS HERE

### cmTriage™

#### Triage, Sort, Prioritize

The first FDA-cleared software in the U.S. for mammography that uses the power of AI to streamline the worklist.

Helps prioritize the most suspicious cases first.

#### Faster reading time

up to 30% increase  
in productivity<sup>1</sup>

<sup>1</sup> CureMetrix internal reader study (2020),  
A. Watanabe, MD, et al.

<sup>2</sup> Journal of Digital Imaging (2019) 32:625-637

<sup>3</sup> Journal of Digital Imaging (2019) 32:618-624

### cmAssist®

#### Identify, Mark, Score

A proprietary, investigational SaaS that uses AI intended to help identify, mark and score regions of interest on screening mammograms.

#### Increase in cancer detection rates

27%, with no increase in  
patient call-back rates<sup>2</sup>

#### Reduction in false positive markings,

69% reduction over  
traditional technology<sup>3</sup>
